Excon 2023

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's economic

growth and overall development and enjoys intense focus from the Government for creating conducive policies to ensure time-bound creation of world class infrastructure in the country.

The Government of India has given a mega push to infrastructure across sectors including roads, power, coal, civil aviation, railways, smart cities, dams and waterways by announcing multiple new projects, which will generate new opportunities for the construction Industry.

In this background, CII organized the 12th edition of 'EXCON - Global Exhibition and Conferences on Construction Equipment,

Machinery & Technology' on 12-16 December in Bengaluru, Karnataka. EXCON is the delivery vehicle of CII for the infrastructure development of the country with a focus on innovation and technology for the Construction Equipment (CE) and machinery sector.

Through these years, the event has been providing an excellent platform for both Indian and overseas companies to display their innovation in terms of technology, product offerings and state-of-the-art of machinery.

The 12th edition of EXCON saw a gathering of construction equipment manufacturers from domestic and international markets, buyers, senior representatives from the Government and participation from all key stakeholders.

The Inaugural

EXCON has retained the position of "South Asia's Largest Event for Construction Equipment" for the last 6 editions.

Inaugurating the mega event, Shri Nitin Gadkari, Minister for Road Transport and Highways, Government of India said that the construction sector will have a significant contribution to the Prime Minister's vision to make India a carbon neutral economy. To achieve this goal, the Government is embarking on major infrastructure and industrial projects that implement sustainable fuels.

66-

The construction sector in India currently ranks as the world's third-largest. Yet, by fostering collaborative endeavors among stakeholders and corporations and through substantial Government support, we have the potential to propel it to the top spot within the next five years. I have confidence that the construction equipment Industry here can achieve the goal.

Nitin Gadkari Minister of Road Transport & Highways Government of India

99

66

The private players in the construction sector should focus on automation, adoption of advanced technologies, global best practices, use of alternative fuels and innovations in utilizing waste materials as raw materials for construction projects to enhance sustainability and efficiency. This approach aims to reduce both the cost of construction and the rate of pollution.

Women Building India Equal Opportunity Awards

Recongising Women in Infrastructure

Gender parity needs to be driven at the leadership level. Companies not only need to become inclusive in hiring and recruitment, but also in impacting the ecosystem by taking steps in gender responsive procurement and creating inclusive supply and value chains.

Mr R Dinesh President, Cll & Chairman EXCON 2023 and Chairman TVS Supply Chain Solutions Ltd

Enhancing the participation of women in the construction industry is a goal that we have to work on with single-minded focus. And for that all stakeholders must work together to make that happen. The role of organizational policies and practices that enable women to build a successful and sustainable career in the construction sector will be a key enabler in this endeavour.

Ms Rumjhum Chatterjee Chairperson CII National Committee on Women Empowerment Co-Founder & Managing Trustee The Infra Vision Foundation

The awards celebrate the strides made by women in real estate and construction, acknowledging their potential to address the skills gap and contribute to the Industry's advancement.

Mr Kamal Bali Chairman, CII Southern Region and President & Managing Director Volvo India

Components - For Global CE Markets

India's infrastructure sector plays a pivotal role towards the goal of a US \$ 5 trillion economy and the construction equipment industry will serve as a crucial catalyst in this transformative journey. However, a notable contrast exists in the raw material costs for manufacturing construction equipment between India and other countries.

Mr Srivats Ram Vice Chairman of CII Tamil Nadu and Managing Director of Wheels India

99

While the country exports less than one-fifth of China's scale, our progress reflects a steady journey marked by an expected 8 per cent increase in equipment manufacturing. Also, the accumulation of components forms the equipment, underscoring the significance of quality in every stage of this process.

Mr Rajesh Bhandari Senior Managing Director of Gates India

Confederation of Indian Industry

The Confederation of Indian Industry (CII) works to create and sustain an environment conducive to the development of India, partnering Industry, Government and civil society, through advisory and consultative processes.

CII is a non-government, not-for-profit, industry-led and industry-managed organization, with around 9,000 members from the private as well as public sectors, including SMEs and MNCs, and an indirect membership of over 300,000 enterprises from 286 national and regional sectoral industry bodies.

For more than 125 years, CII has been engaged in shaping India's development journey and works proactively on transforming Indian Industry's engagement in national development. CII charts change by working closely with Government on policy issues, interfacing with thought leaders, and enhancing efficiency, competitiveness and business opportunities for industry through a range of specialized services and strategic global linkages. It also provides a platform for consensus-building and networking on key issues.

Extending its agenda beyond business, CII assists industry to identify and execute corporate citizenship programmes. Partnerships with civil society organizations carry forward corporate initiatives for integrated and inclusive development across diverse domains including affirmative action, livelihoods, diversity management, skill development, empowerment of women, and sustainable development, to name a few.

As India strategizes for the next 25 years to India@100, Indian industry must scale the competitiveness ladder to drive growth. It must also internalize the tenets of sustainability and climate action and accelerate its globalisation journey for leadership in a changing world. The role played by Indian industry will be central to the country's progress and success as a nation. CII, with the Theme for 2023-24 as 'Towards a Competitive and Sustainable India@100: Growth, Livelihood, Globalisation, Building Trust' has prioritized 6 action themes that will catalyze the journey of the country towards the vision of India@100.

With 65 offices, including 10 Centres of Excellence, in India, and 8 overseas offices in Australia, Egypt, Germany, Indonesia, Singapore, UAE, UK, and USA, as well as institutional partnerships with 350 counterpart organizations in 133 countries, CII serves as a reference point for Indian industry and the international business community.
